

Artem Sidnev

Backend / Platform / AI Automation Engineer

a.sidnevert@gmail.com · [linkedin.com/in/artem-sidnev](https://www.linkedin.com/in/artem-sidnev) · github.com/sidnevert · sidnevert.github.io/personal-web-page

Backend engineer with nearly 4 years of experience building data-intensive systems, internal platforms, and AI automation across banking, real estate analytics, and open-source. Focused on backend performance, developer productivity, and production AI workflows.

Experience

T-Bank

Software Engineer (Backend)

Oct 2025 – Present

Moscow, RU

- Cashback targeting platform: 30M+ transactions/day, 1.5 years of history; 5x speedup via ClickHouse migration
- Introduced AI-assisted engineering workflows: code review bot, CI refactor bot, RAG onboarding agent, personalized customer recommendation assistant
- AI office (OpenClaw): virtual workspace with real-time presence, AI weekly reports, Grafana monitoring; 60% token cost reduction
- Built bank-wide code agent skills library adopted across multiple teams
- Removed 80% of legacy code, achieved full documentation coverage
- CI/CD pipeline accelerated by 30% (20 min faster per run); eliminated all flaky tests
- Kubernetes cluster management and deployment

Freelance

Backend & Automation Engineer

May 2022 – Present

Remote

- **Svobodno (URVI)** — Telegram Mini App for last-minute service bookings. 3 partners onboarded (including DoubleKiss). AI pricing support reduced vacancy by 35%, increased partner revenue by 20%, boosted booking conversion by 25%
- **CIAN Mole** — Commercial real estate analytics. Nationwide district/street-level analysis. Reduced manual data collection by 90%
- **ProofForge** — Open-source peer accountability platform (Go + Next.js). 45% goal completion lift. AI-generated growth dossiers saved 5+ hours per 1:1 prep

Featured Projects

All projects include interactive demos, metrics, and stack details at sidnevert.github.io/personal-web-page.

- **AI Code Review for GitLab** — AI-powered MR review with severity classification and automated fix suggestions [demo](#)
- **AI CI Refactor Bot** — CI-integrated bot that detects tech debt, generates draft MRs, and runs automated test pipelines [demo](#)
- **RAG Onboarding Agent** — Chat-based knowledge assistant for new team members with document retrieval and confidence scoring [demo](#)
- **AI Office (OpenClaw)** — Virtual workspace with spatial zones, real-time presence, and AI-generated weekly reports [demo](#)
- **n8n Cashback Audience Automation** — Workflow automation for cashback campaign creation, partner monitoring, and result tracking [demo](#)
- **CUMock** — Competitive coding platform for 80+ students; real-time sabotage mechanics (TypeScript + WebSocket) [demo](#)

Skills

Languages: Go, Java, Kotlin, Python, TypeScript

Backend: Spring Boot, FastAPI, Node.js, chi, pgx, SQLAlchemy

Data: PostgreSQL, ClickHouse, Kafka, Redis, pgvector

AI / Automation: OpenAI, LangChain, n8n, Code Agents

DevOps: Kubernetes, Docker, GitLab CI, GitHub Actions, Grafana

Frontend: React, Next.js, Tailwind CSS, Telegram Mini Apps
